Design Complete & Construction Slated to Begin Summer 2027!

Couplet: Looking North from KGB

Yenlo: North of Parks Highway

We've achieved a major milestone on the Wasilla Main Street project. The design phase is behind us, construction bids were received in early October 2026, and construction is expected to begin in 2027.

Once construction begins, you'll be able to track updates on the Alaska DOT&PF 511 system at https://511.alaska.gov/map.

At the project's anticipated completion in late summer 2029, you can look forward to:

- Shorter delays at intersections
- Improved connection between Bogard Road and the Palmer Wasilla Highway
- Improved drainage
- Underground utility lines

Perhaps most anticipated safety and community improvements? We'll have new, dedicated and separated pedestrian and bicycle facilities, including a cycle track!

Thanks to everyone who provided input over the many years of this project's development. Your voices matter and we hope you agree this project well reflects not only the needs, but the desires of the community.
